(54) Title: CONNECTOR SYSTEM FOR CONNECTING A FIRST PART AND A SECOND PART, CONNECTOR ASSEMBLY AND DEVICE BOARD

(57) Abstract: The invention relates to a system for connecting a first part and a second part, wherein the first part comprises a power supply line, a plurality of signal contacts and a plurality of ground contacts and the second part comprises a plurality of corresponding signal contacts and a plurality of corresponding ground contacts. The power supply line is connected via at least one ground contact of said first part to a corresponding ground contact of said second part. The first part may be a device board and said second part may be a connector assembly. The invention further relates to a cable connector for use in such a system.
